How much solar power does Finland produce a year?

Seasonal solar PV output for Latitude: 60.1719, Longitude: 24.9347 (Helsinki, Finland), based on our analysis of 8760 hourly intervals of solar and meteorological data (one whole year) retrieved for that set of coordinates/location from NASA POWER (The Prediction of Worldwide Energy Resources) API: Average 5.72kWh/day in Summer.

Where should a large-scale solar PV installation take place?

The most suitable area for large-scale solar PV installations would be any flat land near Helsinki that has good access to sunlight throughout the year. This could include fields or open spaces near Sipoo, Vantaa, Espoo or Kauniainen. Finland ranks 59th in the world for cumulative solar PV capacity, with 404 total MW's of solar PV installed.

Where should I buy solar panels?

We recommend acquiring your panels from a reliable company that is sure to remain in business for the entire lifecycle of your solar power system. A good salesperson will answer any use-phase questions you may have, handle your warranty issues, if necessary, and enable you to expand your system and add new products to it.
