Why did the Energy Department cancel a project?

The Energy Department also canceled funding for projects to reduce emissions from cement production and to develop technology that traps and buries carbon dioxide from industrial smokestacks before the gas escapes into the atmosphere and heats the planet. Some of those terminations appear to have been previously announced in May.

How many projects were affected by the Energy Department funding termination?

The Energy Department did not release the details of the 223 projects affected by the funding termination. But Democrats on the House Appropriations Committee compiled a list of affected projects and released it on Thursday afternoon.

How many projects did the Energy Department review in 2021?

The news was a swift follow-up to plans the Energy Department announced earlier this month to review 179 funded projects, totaling over \$15 billion, that were awarded by the Office of Clean Energy Demonstrations created under the 2021 bipartisan infrastructure law.

Why did the Energy Department cancel funding awards?

The Energy Department's cancellation of more than 300 funding awards slammed the brakes on efforts to reduce carbon emissions, air and water pollution, and strengthen electrical grids. The cancellations of nearly \$8 billion in funding were announced on Wednesday, the first day of a federal government shutdown.

More than \$14 billion in clean energy investments in the U.S. have been canceled or delayed this year, according to an analysis ...
