What is a containerized wastewater treatment plant?

A containerized wastewater treatment plant is a wastewater treatment system that is fully integrated into a container. For uncomplicated and fast transportation, we use 10, 20 and 40-foot shipping containers in accordance with the international ISO standard for our KLARO container systems.

How can a containerized water treatment system help a large-scale reverse osmosis plant?

Take the difficulty out of large-scale reverse osmosis plants with containerized water treatment systems. By choosing pre-designed, module-sized plants, fully assembled in standard 20-ft and 40-ft containers with the option for a 10-ft as well, the complexity and construction of building water purification systems are no longer necessary.

Where are Klaro containerized wastewater treatment systems made?

KLARO containerized wastewater treatment systems are all manufactured, pre-assembled and tested at our site in Bayreuth. You can rely on the top quality of all installation parts. Thanks to the high-quality workmanship, the systems can be operated in any climate zone.

Should you choose Skyview for your containerized water treatment plant?

If you are planning on installing your containerized water treatment plant or container toilet block that requires packaged membrane system, Skyview can be an ideal choice for your needs. Skyview has nearly 10 years of experience in the design and manufacture of custom containerized water treatment equipment.

Each unit is housed in a durable container, requiring minimal site preparation. A single 20-foot container can process sewage for small communities, work camps, or disaster relief zones. ...

The containerized structure of our membrane water treatment system makes it flexible and versatile for a variety of applications, such as municipal wastewater treatment plants, ...
