Who is Asian solar?

Asian Solar is one of Southeast Asia's leading Solar Energy Firms. We are involved in design and installation of solar systems, as well as distributing solar panels from manufacturers in Thailand, China, and throughout Asia. Learn more about what we do Asian Solar has experience with diverse types of clients and installation scales

What is solar energy in Southeast Asia?

Solar energy is the heat and radiant light from the Sun that can be harnessed through technologies such as solar power (used to generate electricity) and solar thermal energy (used for applications like water heating). The Southeast Asia Solar Energy Market is segmented by technology, grid type, and end-user.

What is the Southeast Asia Solar supply chain map?

This edition of the Southeast Asia Solar Supply Chain Map provides a detailed snapshot of current realities and future ambitions, as the region navigates complex trade, investment, and production challenges.

Why is solar power unviable in Southeast Asia?

Photovoltaic installations captured the entire Southeast Asia solar energy market in 2024, making concentrated solar power commercially unviable due to direct normal irradiance seldom exceeding 1,500 kWh per m² per day.
