Who is the largest offshore oil and gas producer in the UAE?

We are the largest offshore oil and gas producer in the UAE, accounting for about half of Abu Dhabi's total oil production capacity, with operations across nine established fields, six artificial islands, three natural islands, eight offshore super complexes and over 400 offshore structures.

Are fuel storage tanks required to comply with API 650?

3.3.1 Fuel storage tanks are required to comply with API 650 or similar internationally recognised standard. The DoE must be informed of any fuel storage tanks constructed according to other similar internationally recognised standards. Such design and construction activity must be carried out by a Qualified Organisation.

What is a field constructed aboveground fuel storage tank?

2.1.15 Field Constructed Aboveground Fuel Storage Tank: a storage tank which is assembled and constructed on site at the relevant facility, and which operates at atmospheric pressure, with more than ninety percent (90%) of its volume aboveground and having a capacity equal to or greater than fifty thousand (50,000) imperial gallons.

These Fuel Storage Tanks Regulations are issued by DoE in accordance with the Law and replace the previous regulations issued by the RSB pursuant to Law No.2 of 1998.

This guide explains why fire protection systems are essential for warehouses, what systems are required, and how warehouse owners can ensure compliance with Abu Dhabi regulations.

At HELIX Safety and Technologies (HST), we believe a Fire Fighting System is more than just an assembly of components; it's a meticulously engineered defense line designed to protect what ...
