What is airport city Accra?

Airport City Accra is an urban development centered around Kotoka International Airport. The development is promoted by Ghana Airports Company Limited on the principle that airports have ceased to be mere terminals, but rather economic growth outlets to promote trade and generate employment.

When was Accra airport built?

In response to globalization and the growing demand for air travel at the time, a development project was launched to reconfigure the structure into a terminal building in 1956. The airport occupies 1610 acres (651 hectares) within the city of Accra, and is about 10 kilometres from the City Centre.

What type of aircraft does Accra airport have?

The airport shares its facilities with Air Force Base Accra, an installation of the Ghana Air Force. It hosts a squadron of Airbus C295 transport aircraft, as well as a helicopter squadron with Harbin Z-9 and Mil Mi-17 utility helicopters.

How far is Accra airport from the city centre?

The airport occupies 1610 acres (651 hectares) within the city of Accra, and is about 10 kilometres from the City Centre. The reference point co-ordinates are 05° 35' 47" North Latitude by 000° 10' 12" West longitude. Elevation is 63.5m (205 ft).
