-----

In the heart of the Sahara Desert, Algeria is embarking on an ambitious journey to transform its energy landscape through a massive solar power project. This initiative not only ...

Algeria has long limited the use of solar to villages in the Sahara, but two large-scale tenders for 3 GW of generation capacity are expected to change that. By including a ...

Algeria has started construction on an 80-megawatt (MW) solar power plant in Bechar province. This project is part of a larger plan to build 15 solar power plants across 12 ...

Algeria's vast geographical advantages, particularly its deserts which receive up to 3,500 hours of solar radiation annually, make it an ideal location for solar and wind energy ...

Algeria has broken ground on two new solar power projects over the past week as part of a drive to build 15 plants with the help of Chinese companies. The drive aims to largely ...

Algeria is taking a major step in its energy transition with the construction of an 80 MW solar power project in Al-Abadla, Bechar province.

Leveraging its abundant natural resources, Algeria is focusing on the development of solar energy as part of its energy transition goals. ...

Algeria accelerates a 3,200 MW solar energy program with major installations, battery storage, and global partnerships to boost renewables.

Algeria's National Electricity and Gas company (Sonelgaz), through its subsidiary Sonelgaz-EnR, has just signed concession agreements with several local and transnational ...

Algeria has long limited the use of solar to villages in the Sahara, but two large-scale tenders for 3 GW of generation capacity are ...

Algeria has started construction on an 80-megawatt (MW) solar power plant in Bechar province. This project is part of a larger plan ...

Algeria is accelerating its transition to renewable energy, particularly solar, with plans to generate 3,000 megawatts of clean ...

Algeria has broken ground on two new solar power projects over the past week as part of a drive to build 15 plants with the help of ...

Leveraging its abundant natural resources, Algeria is focusing on the development of solar energy as part of its energy transition goals. By the end of 2023, Algeria had 437 MW ...

Algeria is accelerating its transition to renewable energy, particularly solar, with plans to generate 3,000 megawatts of clean electricity by 2025.
