What is an uninterruptible power supply (UPS) system?

Uninterruptible Power Supply (UPS) systems provide power to computer networks in the event of a power shortage or electrical outages. Computers and other sensitive electronic equipment can be turned off properly. UPS system batteries keep systems running and help prevent data loss in the event of an unexpected shutdown.

Where are uninterruptible power supplies sourced?

Uninterruptible power supplies are sourced from trusted manufacturers. They're part of our collection of power supply products & protection devices, which protect a load from dangerous changes in power supply.

Does uninterruptible power supply (UPS) provide surge protection?

Many models of uninterruptible power supply (UPS) also provide surge protection. A surge protector blocks spikes in voltage so that they do not harm your electronics. So, your battery backup is always at work, protecting your desktop computer, network equipment, or other electronic equipment and charging its battery when not in use.

Why should you use an uninterruptible power supply?

You'll be glad for your uninterruptible power supply (UPS) the next time your typical power source fails during bad weather or due to an over-extended grid. You'll also be grateful when it saves your electronics from the bad effects of power surges, which can damage all kinds of electronics, including monitors and televisions.

Micro Centers selection of UPS devices includes the industry's most trusted brands like APC and CyberPower Systems. Shop our entire power systems selection here and find the best price ...
