What is AGC solar float glass?

AGC focuses on the industrial production and distribution of ultra-low-iron solar float glass with a highly robust and durable anti-reflective coating, such as Sunmax Premium HT. We specialise in 2 mm to 4 mm front and rear panels for the latest generation of glass-glass photovoltaic modules. Super thin and super strong

What is solar control glass?

(3) Absorbance - the proportion of solar radiation absorbed by the glass. In hot conditions or for building with high internal loads, solar control glass is used to minimize solar heat gain. It allows sunlight to pass through a window while radiating and reflecting away a large amount of the sun's heat.

What is anti-reflective coating on solar glass?

The Anti-reflective coated solar glass gives transmission beyond 94%. Anti-reflection coatings on solar glass consist of a thin layer of dielectric material, with a specially chosen thickness. The refractive index (RI) of the coating material. The thickness of the coating. Selection of coating material with the right refractive index.

What are solar glass products?

Available with added functionalities, such as transparent conductive coatings or anti-reflective coatings, our solar glass products not only offer durable transparent protection to solar panels, but also become a functional component of solar modules.

The "world's largest" transparent organic PV window pushes the glass industry closer to solar-powered facades for Net Zero buildings.

Our extra clear solar glass offers superior solar energy transmittance and is stable under solar radiation. It also survives harsh environmental conditions and protects the sensitive ...

Crafted with heat-treated safety glass, our photovoltaic glass provides the same thermal and sound insulation

as traditional options, flooding spaces ...

The Anti-reflective coated solar glass gives transmission beyond 94%. Anti-reflection coatings on solar glass consist of a thin layer of dielectric material, with a specially chosen thickness.

Crafted with heat-treated safety glass, our photovoltaic glass provides the same thermal and sound insulation as traditional options, flooding spaces with natural light. Perfect for fa&#231;ades, ...

That's photovoltaic glass AOC in action. Unlike traditional solar panels, this innovative material seamlessly integrates into building designs while achieving 15-22% light-to-energy conversion ...

AGC's float glass technology is highly scalable and extremely reliable, providing a sustainable solution for the European solar value chain and ...

In hot conditions or for building with high internal loads, solar control glass is used to minimize solar heat gain. It allows sunlight to pass through a window while radiating and reflecting away ...

In hot conditions or for building with high internal loads, solar control glass is used to minimize solar heat gain. It allows sunlight to pass through a ...

Our extra clear solar glass offers superior solar energy transmittance and is stable under solar radiation. It also survives harsh environmental ...

The Anti-reflective coated solar glass gives transmission beyond 94%. Anti-reflection coatings on solar glass consist of a thin layer of dielectric ...

AGC's float glass technology is highly scalable and extremely reliable, providing a sustainable solution for the European solar value chain and helping our domestic manufacturing industry ...

Discover the importance of tempered cover glass for solar panels, the types of glass used, and AGC's innovative solutions for durability.

Solarshield&#174; is AGC's exclusive range of high-quality tinted fl oat glass designed for commercial, residential and industrial applications.

AGC offers extra clear float glass products for a broad range of solar applications. Your single source: High-efficient float glass production, glass coating, glass processing as well as high ...
