How will tariff chaos affect the stationary battery energy storage industry?

Tariff chaos reigns supreme in the development of the U.S. stationary battery energy storage industry. Facing extraordinary tariffs of 145% on BESS imports into the country, developers will have to rely on inventory to realize projects. When these stockpiles are exhausted the outlook is unclear. Even the 145% tariff rate is uncertain.

How will trump's China tariffs affect battery energy storage?

The Trump administration's China tariffs have piled atop existing and developing trade barriers on battery energy storage systems, components, and materials - destabilizing the U.S. energy storage industry.

Are China tariffs destabilizing the energy storage industry?

The Trump administration's China tariffs have piled atop existing and developing trade barriers on battery energy storage systems, components, and materials - destabilizing the US energy storage industry.

Which international trade issues will remain a concern for energy storage projects?

Two major areas of international trade that will remain causes of concern for energy storage projects are the application of tariffs and supply chain integrity.

Tariffs deter foreign investments in the LDES market, particularly from Asia-Pacific players dominating material production. Uncertainty around costs delays large-scale ...
