What is an uninterruptible power supply (UPS)?

An uninterruptible power supply (UPS) using a standard commercial power system is also easy to find and costs less than other types of power supplies. When there are no issues with the commercial power supply, alternating current (AC) is sent directly to the connected device, while the battery is charged through a rectifier.

What are the different types of uninterruptible power supply (UPS) output waveforms?

There are two types of uninterruptible power supply (UPS) output waveforms: sine wave and square (rectangular) wave. A sine wave UPS is recommended because it is compatible with PC servers. While square wave UPS units are more affordable and easier to find, they are not suitable for PC servers with built-in components.
