Our containerized and trailer-mounted lithium battery systems are built to replace diesel generators with zero-emission, high-capacity electric power.

With a large capacity of 2 MWh, this vehicle offers ample storage to meet the demands of various industries. Equipped with six new energy vehicle charging guns, it allows ...

The iMContainer addresses this by acting as a mobile charging station that can service multiple vehicles simultaneously. Key Benefits: Fast charging with six EV charging ...

With robust containers, integrated fire suppression, and thermal management systems, CBS provides a safe and reliable environment for energy storage and management, minimizing ...

With exceptional energy density and extended runtime, this portable power solution supports hours of continuous operation, making it ideal for both ...

Housed in a durable 10-foot ISO container, the Charge Qube is an all-in-one energy storage and charging system that integrates into existing energy networks or operates ...

With flexible deployment, rapid setup, and dual high-power charging outputs, it enables instant energy delivery to EVs in the ...

2MWh large capacity container energy storage charging station, equipped with 6 car charging guns at the same time can output 200kW charging power, also provides a variety of industrial ...

With exceptional energy density and extended runtime, this portable power solution supports hours of
