How do I set up a base station?

Set up the base station using either the tripod or T-bar mounting method. You must use an external radio antenna kit for the internal 450 MHz or 900 MHz radio. To avoid interference between the 900 MHz radio and GPRS transmissions, do not mount the external radio antenna within 1 m (3.3 ft) of the GSM antenna.

Can basestation fill a PDF?

Hi!

How many base station sites are there in the water district?

The District's GPS base station network comprises 19 sites, 8 of which are National Oceanic and Atmospheric Administration /National Geodetic Survey Continuously Operating Reference Station sites. View the maps below for approximate locations of the Water District's base station network:

What is a managed base station?

Trimble recommends that base stations that are connecting from a portable, daily-use setup are treated as unmanaged base stations and those used for permanent or semi-permanent setups where the receiver will be in the same place for a longer period of time are treated as managed base stations.
