Are hotels rethinking their energy use with sustainability?

Hotels everywhere are rethinking their energy use with sustainability in mind. Behind the dimmed lighting in your room, perfectly adjusted bathroom temperature or the cool air in the lobby, a (r)evolution is underway. Renewable energy is gradually becoming the norm in the hotel industry.

How can a hotel save energy without sacrificing comfort?

Every hotel stay uses a lot of energy: hot water, heating, air conditioning, lighting... the list goes on. But how can it be reduced without sacrificing comfort? This is increasingly the question hoteliers are asking - and they're finding the answer in renewable energy. Solar power is becoming more common.

Does Sofitel Barcelona skipper use solar energy?

Solar power is becoming more common. Panels on the roof of Sofitel Barcelona Skipper provide part of the energy needed to run the hotel. Geothermal energy, which harnesses heat in the ground, can also optimise a building's thermal performance.

What makes F Zeeen a sustainable resort?

In addition to solar power, F Zeeen has adopted sustainable materials, water conservation practices, and energy-efficient lighting. This approach allows the resort to offer luxurious amenities while maintaining a minimal carbon footprint.
