What is a Berner air curtain?

A Berner air curtain is an effective solution to prevent heating or air conditioning from escaping through open doors. It provides energy savings, personal comfort, and insect control. Architects, builders, and specifiers who demand the best choose Berner.

What is the Berner air curtain energy savings calculator?

Berner International Corp. has recently introduced the Berner Air Curtain Energy Savings Calculator, a user-friendly, online energy savings estimation tool accessible by any web browser for quick payback calculation and air curtain selection.

What is a Berner air entrance system?

The Berner Air Entrance System is a recirculating air seal built into the entrance, effectively creating a barrier between indoor and outdoor temperature conditions. Plus, they're easy to install, operate and maintain.

How long do Berner air curtains last?

Berner Industrial Air Curtains (Air Doors) employ the correct balance of volume, velocity and uniformity, meaning an unheated unit has an average payback of two years or less. Berner has models designed to protect almost any opening, all the way up to a 50' high door. Ready to get started?
