How much does electricity cost in Boston?

It is 14.4% greater than the average cost in Boston one year ago (22.9 c/kWh). Boston residents also pay more than their counterparts in Philadelphia, New York City, and the New England region as a whole (18.5 c/kWh, 24.8 c/kWh, and 25.1 c/kWh respectively). The figures for Boston reflect average costs in the Boston-Cambridge-Newton metro area.

How do I buy electricity in Boston?

If you live in Boston, you can choose to buy electricity for your home in one of three ways: Basic service from Eversource: Basic service is where you buy electricity directly from your utility company, which in the case of Boston is Eversource Energy (formerly NSTAR).

Why are Boston electricity prices so high?

Prices are higher in the middle of summer and autumn and escalate when temperatures fall at the beginning of winter. That means signing up for or switching providers at the right time can reduce Boston electricity costs. Check out more Boston energy rates to see additional plans and options available in your area.

How much do solar panels cost in Boston?

Solar panel installations in Boston offer an incredibly high level of savings - on average between \$68,073 and \$83,201. This is mainly down to two factors: the Massachusetts SMART program (probably the most generous solar incentive program in the country), and the high residential electricity rates paid by customers here.

Let's face it - with electricity bills doing their best rocket launch impression and power outages becoming as common as avocado toast at brunch, home energy storage ...
