Does Belgium have a charging infrastructure for EVs?

This article, part of a three-part series on the charging infrastructure for EVs in Belgium, focuses on the key subsidies and fiscal incentives concerning EVs in Belgium. Read the article in full. This article was originally published in the Energy & Natural Resources Newsletter of the International Law Office.

Are charging stations a bottleneck in Belgium?

As in other European nations, the deployment of charging stations in Belgium faces bottlenecks due to lengthy approval times. The installation of new high-voltage cabins, charging stations, and canopies necessitates obtaining authorisations--a process that, in many cases, can be significantly time-consuming.

How does Belgium support EV users?

Belgium extends generous support to all EV users by offering an impressive 75% deduction from the cost of charging as an Income Tax benefit. This substantial financial incentive is available to all citizens embracing electric driving, with no specified expiration date.

Does Brussels offer a tax saving on office parking spaces?

In the vibrant heart of Belgium, Brussels offers a unique incentive for companies: a tax saving of up to EUR75 on office parking spaces when equipped with charging units. This tailor-made initiative underscores Brussels' dedication to fostering electric mobility within its corporate landscape.
