The PPC group of companies in Romania announces the launch of the first charging solution in the PPC blue network that works 100% with renewable energy directly ...

The PPC group of companies in Romania announces the launch of the first charging solution in the PPC blue network that works ...

The station allows charging two cars simultaneously, with a power of 5,5 kW each, and operates only with solar energy, stored in its own system. A major advantage of the ...

To further illuminate the impact of solar-integrated Level 2 EV chargers, consider a pilot project conducted in Bucharest. The city's local government has installed solar panels atop public ...

On June 26, 2025, the Sector 2 Municipality of Bucharest inaugurated Romania's first electric vehicle charging station powered exclusively by solar energy. The station, developed by ...

Bucharest's District 2 has launched a pilot project that makes it the first community in Romania to host a fully autonomous, solar-powered EV ARC charging station.

This bidirectional charging capability, combined with solar power, creates a more resilient and sustainable energy ecosystem. Smart ...

This state-of-the-art charging station is equipped with two 5.5 kW/h charging points, designed to serve up to two electric vehicles simultaneously. The system incorporates ...

Romania's bustling capital, Bucharest, has marked an important milestone in promoting sustainable transport

with the introduction of its first two solar-powered charging ...

This state-of-the-art charging station is equipped with two 5.5 kW/h charging points, designed to serve up to two electric vehicles ...

With two charging points and a commitment to reducing carbon emissions, this initiative not only supports eco-friendly transportation but also showcases how smart city projects can enhance ...

Romania's bustling capital, Bucharest, has marked an important milestone in promoting sustainable transport with the ...

Bucharest's District 2 has launched a pilot project that makes it the first community in Romania to host a fully autonomous, solar ...

You'll find all the information you need to charge your vehicle: types of charging points, access, opening times, prices, photos and comments shared by 2M+ Chargemap community members.

This bidirectional charging capability, combined with solar power, creates a more resilient and sustainable energy ecosystem. Smart charging algorithms will automatically ...
