Cape Town builds 7 MW city-owned solar plant in Atlantis, targeting 35% renewable energy by 2030 and reducing carbon emissions through municipal energy independence.

As of mid-2025, the power generated from these initiatives is now enough to supply electricity to approximately 150 000 homes. It has been a decade of progressive action ...

Joel Nana, a project manager with Sustainable Energy Africa, a Cape Town-based organization, called it "a bottom-up movement" to sidestep a generations-old problem.

Cape Town's Small-Scale Energy Generation programme promotes uptake of rooftop solar and wind turbines. The city won a High Court case to allow citizens to sell their excess electricity ...

"This is one of our flagship projects in our priority programme to build a more secure energy future, with advanced plans to diversify energy sources for cleaner and more affordable ...

Cape Town is set to become the first city in South Africa to own and operate its own solar plant. Construction is now underway on the city's own 7 MW facility, which will have ...

Cape Town is on track to become the first city in South Africa to own and operate a solar power plant, marking a significant move towards energy independence.

Our strategy is grounded in three key commitments: to end load-shedding, to alleviate energy poverty, and to optimise energy use across Cape Town.
