-----

Chinese-owned developer Chint Solar and UK-based developer Voltis are poised to develop 5GW of renewable energy and energy ...

China's global dominance in solar panel and battery production shows that the energy transition is not only an environmental necessity, but also an economic, technological ...

Labour MP Sarah Champion said GB Energy should be buying solar panels from companies in the UK rather than China, where there ...

Those campaigners claimed that 97 per cent of solar panels sold in the UK include materials from Xinjiang. They had also provided case studies of solar panels which were ...

Chinese-owned developer Chint Solar and UK-based developer Voltis are poised to develop 5GW of renewable energy and energy storage projects in the UK.

The UK Government has moved to block the new publicly-owned clean energy company, GB Energy, from using solar panels imported from China and using slave labour to ...

Labour MP Sarah Champion said GB Energy should be buying solar panels from companies in the UK rather than China, where there have been allegations of forced labour in ...

The energy capacity of new battery, wind, and solar projects that received approval climbed to 45GW this year, 96% higher than in 2024, according to data from Cornwall Insight.

Those campaigners claimed that 97 per cent of solar panels sold in the UK include materials from Xinjiang. They had also provided ...

In southern UK, a battery storage project by the Chinese company Huaneng is helping to secure greater stability and flexibility of ...

MI5 is helping establish the extent to which the use of ...

However, the UK's reliance on Chinese solar manufacturers--now accounting for over 68% of its solar panel imports in 2024--poses a dual-edged sword. While Chinese panels ...

If a wind farm or solar panel breaks, the UK might struggle to obtain the parts needed to fix it. Many large batteries, which store solar and wind energy for later use, are ...

MI5 is helping establish the extent to which the use of Chinese technology such as solar panels or industrial batteries could pose potential future security threats, according to ...

In southern UK, a battery storage project by the Chinese company Huaneng is helping to secure greater stability and flexibility of power supply in the country.
