Currently, about 75% of the equipment required for the modernization of the Chisinau Power Station has been delivered. Ruslan Surugiu, Director of the Energy Project Implementation ...

This article explores the technical design, environmental impact, and socioeconomic benefits of the Vientiane Solar Photovoltaic Off-Grid Power Station - a blueprint for rural electrification in ...

The estimated construction period for the new power plant and thermal energy storage is until 2030. The process of modernizing generating capacities has already begun: ...

The objective of the project HA-G1048 is to maximize the use of the energy produced by the 8-MWp solar photovoltaic plant (SPP) to further reduce the use of thermal power, by ...

Energy Minister Dorin Junghietu has visited the Chisinau Power Station and stressed the need to mobilize the labour forces, in ...

Energy Minister Dorin Junghietu has visited the Chisinau Power Station and stressed the need to mobilize the labour forces, in order to finish the work as quickly as possible.

The tender aims to construct wind power plants with a capacity of up to 105 megawatts and photovoltaic plants with a maximum ...

CHP Source 1 power station (Sursa 1, ??? ??????? I, ??????????? ??-2) is an operating power station of at least 258-megawatts (MW) in Chisinau, Moldova.

The power generation site is operated by the local utility company Energie Wasser Bern (EWB) and contains a
