The coal mine to solar transition is underway, and this potential is ready to be unlocked in major coal producers like Australia, the U.S., Indonesia and India.

This fact sheet summarizes key considerations and approaches to support communities and developers in repurposing coal power plants to solar and storage facilities.

Global renewable energy company RWE Clean Energy is advancing development in the US Midcontinent Independent System Operator (MISO) territory in a unique way: ...

A leading U.S. coal producer is partnering with a major developer of renewable energy projects to put solar energy and battery storage installations on reclaimed mine lands in...

These projects provide a pathway to a sustainable, economically viable future for energy communities, preserve jobs and provide clean energy to meet America's increasing ...

Industrial landscapes are shifting, particularly in regions historically dependent on coal mining. In a pioneering move, Peabody Energy and RWE will convert abandoned mine ...

Global renewable energy company RWE Clean Energy is advancing development in Midcontinent Independent System Operator (MISO) territory in a unique way: transforming former coal ...

A collaborative initiative involving The Nature Conservancy (TNC), Cumberland Forest Limited Partnership, Sun Tribe Development, and ENGIE aims to convert 17 former ...

17 former coal mines in the US are being transformed into clean energy hubs, featuring 14 solar farms and
