-----

Cell ID (CID) positioning is a network based technique that can be used to estimate the position of the UE quickly, but with very low accuracy. In the simplest case, the position of the UE is ...

Private LTE and 5G networks provide: 1. Smart Port Operations. Ports are deploying private mobile networks to automate container handling, crane operation, and logistics. Real-time data ...

Private LTE and 5G networks provide: 1. Smart Port Operations. Ports are deploying private mobile networks to automate container handling, crane ...

The model was capable of finding the optimal base station locations with minimum installation and operational costs considering the capacity and quality of service constraints.

Coordinated Container Migration and Base Station Handover in Mobile Edge Computing Published in: GLOBECOM 2020 - 2020 IEEE Global Communications Conference Article #: ...

An LTE Base Station Deployment Checklist is a comprehensive guide designed to streamline the process of setting up LTE base stations. This checklist ensures that all critical steps, from site ...

In this paper, we summarize the following conclusions obtained by different scholars in different application scenarios by querying the relevant literature on rational ...

Surveying industrial private LTE and 5G networks is instrumental in enhancing connectivity, operational efficiency, and innovation across various sectors.

As wireless networks evolve, LTE packet backhaul and base station equipment play a crucial role in ensuring

reliable, high-speed connectivity. These components form the ...

We implement a testbed edge computing system with our proposed coordinated migration-handover mechanism, and evaluate the performance using real-world applications ...

Surveying industrial private LTE and 5G networks is instrumental in enhancing connectivity, operational efficiency, and ...

In this paper, we address the joint problem of container migration and base-station handover by proposing a coordinated ...

In this paper, we address the joint problem of container migration and base-station handover by proposing a coordinated migration-handover mechanism, with the objective of ...

As wireless networks evolve, LTE packet backhaul and base station equipment play a crucial role in ensuring reliable, high-speed ...
