Argentina's first energy storage tender drew 1.347 GW of bids from 15 companies proposing 27 projects, exceeding the 500 MW target and representing more than \$1 billion in ...

A leading automotive plant reduced downtime costs by 68% after installing a 2MWh BESS unit, maintaining continuous production during Argentina's 2023 grid instability period.

A leading automotive plant reduced downtime costs by 68% after installing a 2MWh BESS unit, maintaining continuous production during Argentina's 2023 grid instability period.

Think of energy storage systems as giant power banks for cities - that's exactly what the Cordoba Energy Storage Power Station brings to Argentina's electricity grid.

The initiative aims to deploy 500 MW of battery energy storage systems (BESS) in the Greater Buenos Aires Area (GBA), but the submitted capacity has far exceeded ...

The international tender, first announced in February, aimed to secure 500 MW of energy storage capacity for critical points in the ...

The first large-scale battery energy storage tender in Argentina is catching the attention of the international community as an unequivocal ...

The Cordoba New Energy Storage Power Station, one of South America's largest battery storage projects, aims to solve this problem. By storing excess energy during peak generation periods, ...
