What is a solar container build?

It's a modified shipping container built to house solar panels, batteries, inverters, and other off-grid power systems. These units are ideal for powering remote sites, construction camps, emergency setups, or as a portable backup energy system. What's included in a solar container build?

What is a solar skid shipping container?

At SCS Australia, we provide advanced solar skid shipping containers designed to deliver reliable, renewable energy wherever you need it. Perfect for remote projects, off-grid living, and temporary sites, these containerised solar systems combine durability, portability, and sustainable performance.

What are shipping container solar panels?

Our shipping container solar panels are designed to withstand the rigors of outdoor use and provide long-lasting performance. We utilise high-quality solar panels that are built to withstand harsh weather conditions, including extreme temperatures, rain, and wind.

Are solar containers safe?

Yes-- all solar containers are built from weatherproof, lockable shipping containers. Your gear is safe from the elements and secure from unauthorised access. Can the system be expanded later on?
