-----

Croatia is expected to surpass 1 GW of solar power by 2025, driven by a significant increase in installations and supportive policies. ...

Croatia's cumulative solar capacity reached 1,099 MW at the end of June 2025, according to figures from the Renewable Energy Sources of Croatia Association (RES ...

Croatia is expected to surpass 1 GW of solar power by 2025, driven by a significant increase in installations and supportive policies. The expansion is part of the country's broader ...

At the end of November 2024, Croatia had 25,406 solar power plants on the distribution grid, with a total capacity of 776 MW. The ...

But a group of islanders is now trying to harness the power of the 3,000 hours of sun they enjoy yearly and help the community decarbonize by 2040 with a citizen-owned solar ...

This article analyzes the pros and cons of installing photovoltaic power plants in Croatia's coastal areas, including economic factors, available subsidies, and maintenance challenges due to ...

Croatia installed a total 397 MW of solar in 2024, bringing its cumulative capacity to around 872 MW, and surpassed the 1 GW milestone in May. If the trend seen in the first half ...

Croatia's cumulative solar capacity reached 1,099 MW at the end of June 2025, according to figures from the Renewable Energy ...

In 2025, Croatia achieved a significant milestone by surpassing 1 GW of installed solar capacity, marking a pivotal moment in ...

According to an analysis by the Energy Institute Hrvoje Pozar (EIHP), Croatia ranks among the leading European Union countries in terms of the share of renewable energy in ...

Croatia experienced accelerated growth in renewables over the past year, yet the sector faces critical bottlenecks. By the end of 2024, the country had reached 3.8 GW of ...

At the end of November 2024, Croatia had 25,406 solar power plants on the distribution grid, with a total capacity of 776 MW. The country achieved growth of 60% since ...

Croatia installed a total 397 MW of solar in 2024, bringing its cumulative capacity to around 872 MW, and surpassed the 1 GW ...

Croatia crossed the 1 GW milestone in May 2025 and, if current trends persist, could reach 1,290 MW by December 2025. The self-supply sector, particularly households and ...

In 2025, Croatia achieved a significant milestone by surpassing 1 GW of installed solar capacity, marking a pivotal moment in the country's renewable energy journey.
