-----  
Does Cyprus have a marine environment law?

7. The Marine Environmental Protection Law (Law No. 147 (I) of 2003) Cyprus has an extensive coastline, and protecting the marine environment is crucial for the country's economy, particularly in terms of tourism and fisheries.

How does Cyprus protect the marine environment?

Cyprus has an extensive coastline, and protecting the marine environment is crucial for the country's economy, particularly in terms of tourism and fisheries. Marine Pollution Control: The law aims to prevent pollution from ships, offshore activities, and land-based sources from entering the marine environment.

How does Cyprus protect its water resources?

2. The Water Pollution Control Law (Law No. 106 of 2002) Cyprus has a significant focus on protecting its water resources, given its semi-arid climate and water scarcity concerns. Water Quality Standards: The law establishes water quality standards for surface and groundwater, including thresholds for pollutants in water bodies.

Who enforces environmental regulations in Cyprus?

In Cyprus, the enforcement of environmental regulations is predominantly the responsibility of several key government agencies. The Department of Environment, operating under the Ministry of Agriculture, Rural Development and Environment, plays a pivotal role in monitoring compliance with environmental laws.

CETO demonstrated that shipping of CO<sub>2</sub> at low-pressure condition is feasible, and that the technology is ready for first use.

Cyprus is heading towards a serious institutional crisis over environmental issues due to systematic delays in
