As the Czech Republic accelerates its transition to clean energy, the Brno Wind and Solar Energy Storage Project stands as a landmark initiative. This article explores how cutting-edge battery ...

That same year major Josef Mach claimed that the electricity from the Temelín nuclear power plant in the Czech Republic would be abandoned. He is known as one of the biggest Temelín ...

The Czech Republic had almost two gigawatts (GW) of photovoltaic capacity at the end of 2010, but installed less than 10 megawatts (MW) in 2011 due to the feed-in tariff being reduced by 25%, after installing almost 1,500 MW the year before. Installations increased to 109 MW in 2012. In 2014, no new installations were reported.

This initiative is a clear signal of the growing importance of energy storage in balancing grids and integrating renewable energy sources like solar and wind.

How can Czech organisations make the most of their renewable generation assets? Here's a review of energy storage in the Czech market.

Are you looking for information on renewable energy in Czech Republic? In this CMS Expert Guide, we tell you everything about it.

Wind power can be exploited the most in winter, when the wind is strongest and most stable, while in the summer the production of solar power rises. Both sources, therefore, ...

Energy Minister Petr Hladík announced that the Ministry of Industry and Trade has prepared an amendment to the Act on Supported ...

Czech wind and solar energy storage wind and solar power station
