As one of the important industrial aluminium profiles produced by Otalum, our solar aluminium frame can provide great structural stability for the overall combination of glass, EVA ...

Engineered to endure the test of time, our aluminium frames for solar panels are built to last, providing a reliable foundation for your solar panels year after year.

Aluminium solar panel frames are essential components of photovoltaic systems, providing structural support while securing and protecting solar panels from mechanical damage and ...

Understanding the technical specifications of aluminium frames is essential for selecting the right frames for your specific solar installation. This article delves into the key ...

Engineered to endure the test of time, our aluminium frames for solar ...

Aluminum solar panel frame is a supporting structure that surrounds and secures a solar panel. It is typically made of extruded aluminum and provides a rigid and durable frame that can ...

We are capable of supplying sections duly cut to size & finished (Anodized) ready to use as Solar Frames. Our Aluminium Solar Frame sections come in various shapes and sizes, to ...

The aluminium frames around the solar panel, hugging the glass covering on top and the back-sheet at the bottom, has been important, though often ignored component of a solar panel.

Choose our aluminum solar panel mounting frames for your next solar panel mounting project and experience the safety, durability and ease of installation our frames offer.
