NYSERDA offers incentives for grid-connected residential and commercial customers to install standalone energy storage or systems paired with a new or existing on-site renewable ...

Several major utility companies in the United States offer Virtual Power Plant (VPP) programs, leveraging Distributed Energy ...

For residential solar-plus-storage adopters, distributed generation looks like this: solar photovoltaic panels on or near the residence harvest solar energy and deliver it through a ...

By producing energy closer to where it's consumed, distributed models also help absorb excess solar and wind output, reducing grid strain and minimizing curtailment. Energy ...

Several major utility companies in the United States offer Virtual Power Plant (VPP) programs, leveraging Distributed Energy Resources (DERs) like rooftop solar, battery storage, ...

Berkeley Lab collects, cleans, and publishes project-level data on distributed* solar and distributed solar+storage systems in the United States. The data are compiled from a variety of ...

The City University of New York formed the Smart Distributed Generation Hub (Smart DG Hub) to develop a strategic pathway to a more resilient distributed energy system, and is supported by ...

Imagine your house secretly moonlighting as a mini power station - that's essentially what distributed solar energy storage systems do. These setups combine solar ...

Retail energy storage project development is concentrated in the NYC region; a region where there is not adequate land available for traditional community solar projects but where ...

The Company develops solar and Battery Energy Storage System (BESS) projects that sell electricity to utilities, commercial, industrial, municipal and residential off-takers.

This resource page looks at ways to ensure continuous electricity regardless of an unforeseen event are by using distributed energy resources.
