What is Finland's next-generation mobile communication technology roadmap?

The roadmap sets milestones for the development and implementation of next-generation mobile communication technologies in the 2030s. Finland's goal in the 2030s is to remain a pioneer in mobile networks and network technologies. The roadmap also sets six other goals: 6G promotes sustainable development and energy efficiency.

Does Finland have a 6g roadmap?

Finland is a pioneer of safe, secure, and reliable network technologies and one of the first to publish a 6G roadmap. This roadmap allows Finland to ensure that we stay on top and create conditions for growth, says Minister of Transport and Communications Lulu Ranne. There are four priorities in the 6G roadmap to achieve the goals.

What is Finland's goal in the 2030s?

Finland's goal in the 2030s is to remain a pioneer in mobile networks and network technologies. The roadmap also sets six other goals: 6G promotes sustainable development and energy efficiency. - Finland is a pioneer of safe, secure, and reliable network technologies and one of the first to publish a 6G roadmap.

How can Finland boost its competitiveness?

Finland must also ensure that it has sufficient and varied 6G expertise. Test environments, taxation that encourages investment and project support are among the things that we can do to boost the competitiveness of our businesses.

The TUUTTI project will prepare Finland's communications network policies until 2037. The project will also take into account ...
