Does ACS do inverter repairs?

Yes, ACS provides Inverter Repairs for Industrial Inverter Drives! ACS has an expert tech team for repairing your inverter drive! Including industrial DC to AC inverter drives - 12,24, or 48 volt DC to 120-240 AC voltage models made by most manufacturers.

Who is the inverter service center?

The Inverter Service Center team are electrical system experts that focus on a wide range of applications, from boats, RVs, utility vehicles, solar and backup power applications - anywhere. We can help with design or customization of an electrical system to meet your specific vehicle or off-grid needs.

What happens if the inverter goes into protection mode?

The fault indicator, audible alarm, and system shut down will occur if the Inverter has gone into Protection Mode. Battery Voltage must be above 11V. With a multimeter test for DC Voltage at the Battery terminals of the Inverter to verify you are within the operating voltage range.

How do I know if my inverter has a low voltage?

The audible alarm will sound as a warning that the DC Input Voltage is getting close to its limits on the Low and High End. Battery Voltage must be above 11V. Battery Voltage must be below 15V. With a multimeter test for DC Voltage at the Battery terminals of the Inverter to verify you are within the operating voltage range.
