Should you choose a solar light with low lumens?

If you pick a solar light with low lumens, it might look pretty but won't light up your garden path. On the other hand, a solar light with high lumens will give you the brightness you need without wasting energy. With that in mind, let's uncover why watts, though familiar, no longer tell you the full brightness story.

If you want a solar light that truly lights up your garden, street, or security area, you must look at the lumens--not watts. Watts only measure power usage, while lumens show ...

The market offers a diverse array of xiaomi solar lights, each catering to specific lighting needs and aesthetic preferences. Common types include pathway lights, spotlights, and string lights.
