---

LONGi and Elecnor Group today announced the signing of a new ground-mounted photovoltaic (PV) plant project in the Dominican Republic. This significant collaboration will ...

The selection of the new Hi-MO 9 modules underscores their superior performance and efficiency, aligning perfectly with the project's ...

The new plant will be equipped with LONGi's Hi-MO 9 series modules in their first-ever deployment in the country. The project is owned ...

According to LONGi, this is the first deployment of its Hi-MO 9 modules in the Dominican Republic. The modules feature n-type HPBC back contact cell technology and ...

The selection of the new Hi-MO 9 modules underscores their superior performance and efficiency, aligning perfectly with the project's demanding power generation and ...

This park comes after one of our major projects in the country: the construction of Mata de Palma in 2019, the largest park on the island to that date with a capacity of 65 MW and 200,694 solar ...

This park comes after one of our major projects in the country: the construction of Mata de Palma in 2019, the largest park on the island to ...

Solar energy is at the heart of the Dominican Republic's strategy. The country's total installed solar photovoltaic (PV) capacity now ...

The Dominican Republic's commitment to solar energy in public infrastructure has demonstrated remarkable success, with ...

GGGI will support the development of an alternative model to solar PV expansion, consisting in smaller solar PV system (10-25MW) that will be connected to the 69kV network, with solar ...

A central aim of the Renewable Energy Promotion Law of 2007 in the Dominican Republic has been to lessen the country's carbon footprint. Towards this goal is the construction of a 11.44 ...

The Dominican Republic's commitment to solar energy in public infrastructure has demonstrated remarkable success, with numerous projects showcasing the viability and ...

GGGI will support the development of an alternative model to solar PV expansion, consisting in smaller solar PV system (10-25MW) that will be ...

LONGi, a global leader in solar technology, has been selected by Spain's Elecnor Group to supply its newest Hi-MO 9 modules for a 60 MW ground-mounted photovoltaic (PV) project in the ...

Solar energy is at the heart of the Dominican Republic's strategy. The country's total installed solar photovoltaic (PV) capacity now stands at approximately 1,077 MW, a figure ...

The new plant will be equipped with LONGi's Hi-MO 9 series modules in their first-ever deployment in the country. The project is owned by Dominican power producer Empresa ...
