How competitive is the solar photovoltaic (PV) module industry in Europe?

The solar photovoltaic (PV) module industry in Europe is dynamic and highly competitive, with several key players across the supply chain, ranging from module manufacturers to developers and system integrators. European companies are working to ramp up the domestic production.

What is Europe solar PV module market?

Europe Solar PV Module Market was valued at USD 63.1 billion in 2024 and is estimated to grow at a CAGR of 7% from 2025 to 2034. A solar photovoltaic (PV) module is a device that converts sunlight into electrical energy using photovoltaic (solar) cells. It is the most common component used in solar energy systems.

How many companies in Europe manufacture solar PV modules?

Today, at least 38 companies are active in Europe manufacturing the equipment and machinery that produces vital steps of the solar PV module supply chain, including cells, ingots, wafers, and polysilicon. EU Clean Industrial Deal: Opportunity for renewables and European manufacturing

What does the new EU report 'solar production equipment' mean for solar PV?

The new report „Solar Production Equipment - Key players in the EU's industrial ecosystem for solar PV“ explores the European capacity to manufacture the equipment and machinery that produces at each stage of the solar module manufacturing process.

A new market analysis from SolarPower Europe highlights the potential of European solar production to underpin the resilience of the European sector. SolarPower ...

The solar photovoltaic (PV) module industry in Europe is dynamic and highly competitive, with several key players across the supply chain, ranging from module manufacturers to ...

These cells are assembled into solar panels and then installed on the ground, rooftops or floating on dams or

lakes. The EU funds many solar ...

Five key trends shaping the European solar industry in the second half of 2025 -- prices, policies, technologies, financing, and evaluation. This guide helps businesses seize ...

Summary: This article explores the dynamic landscape of EU solar PV module companies, analyzing market trends, technological innovations, and growth strategies.

Discover the state of solar panel manufacturing in Europe, the challenges posed by imports, and what EU countries are doing to rebuild local production. Learn how European-made solar can ...

According to the latest data, prices for PV modules in Europe remained steady across all segments in October 2025. This stability is a stark contrast to previous months, ...

During January-October 2024, EU countries imported approximately 83 GW of PV modules from China, with total imports expected to be around 100 GW by the end of the year. ...

Five key trends shaping the European solar industry in the second half of 2025 -- prices, policies, technologies, financing, and ...

This year's report features an overview of EU solar hot topics in 2024, which includes relevant updates for the solar PV sector at the upstream, downstream and legislative ...

These cells are assembled into solar panels and then installed on the ground, rooftops or floating on dams or lakes. The EU funds many solar cell projects, such as the PERTPV project, in ...

What are the optimal levels of strategic solar module stockpiles in the European Union (EU) for achieving climate neutrality by 2050, and how might such stockpiles influence ...
