Through the Scaling Solar initiative, in March 2016, IFC signed an agreement with the Malagasy Government to construct a plant of approximately 25 MW, connected to the ...

A novel energy storage system, TWEST (Travelling Wave Energy Storage Technology) - simple, compact and self-contained - is at the heart of the E2S power plant conversion concept.

But here's the kicker: new compressed air energy storage (CAES) systems combined with lithium-sulfur batteries could potentially slash energy costs by 40% while boosting renewable integration.

Moreover, sustained population growth continues to fuel energy needs, making the management of the electricity grid even more critical. The coming weeks are likely to be ...

SUSI Partners AG launched the world's first dedicated energy storage infrastructure fund in early 2017 with the aim of bridging the gap between volatile renewable energy supply and the ...

As Madagascar embraces renewable energy, storage becomes the missing puzzle piece - the tsaky (malagasy chili) in the energy stew. From powering remote villages to ...

Madagascar's capital, Antananarivo, where 3 million residents navigate streets as steep as San Francisco's - but with power outages threatening to stall both electric vehicles ...

The new 100MW solar plants with battery backups [4] aim to make those horror stories history. It's not just about keeping lights on - hospitals can now refrigerate vaccines ...

Compressed Air Energy Storage (CAES) plants have emerged as promising solutions in which energy is
