What is a heavy duty hazmat chemical storage building?

EPI Chemical Storage now offers Heavy Duty HazMat Chemical Storage Buildings that are built using durable, high quality materials and offer the best available technology to provide safe, OSHA compliant storage of chemicals and other hazardous materials. Click Here to see the many different sizing configurations.

How are shelter works chemical storage buildings built?

Shelter Works chemical storage buildings are built using proprietary Fiberbeam(TM) and FiberWrap(TM) which includes acid corrosion resistant fiberglass, which enhance the durability, reliability, and safety of the enclosure.

How can I design a hazard containment enclosure?

When hazardous chemicals are involved, we can design the enclosure to have a localized secondary containment basin to capture and contain liquids when primary containment measures fail. We can also incorporate a full shelter containment flooring system sized for 'worst-case volume' with a walkable fiberglass grid floor.

What is a fiberglass chemical storage building?

Fiberglass (FRP) chemical storage buildings are used in various municipal and industrial applications. They provide a controlled space to store hazardous and non-hazardous chemicals. Fiberglass chemical enclosures are safer for storing chemicals and housing chemical feed systems because fiberglass does not react with most chemicals.

Before we sell our folding container houses, we put them through a series of tests. We simulate earthquake conditions in a controlled environment to see how the house responds.

Whether it is a single building for chemical storage or a larger shelter to house a chemical feed system that

requires multiple rooms, we can custom design the best protective solution for you.

Ideal for post-earthquake relief zones, refugee camps, and emergency response missions, these containers can be quickly transported, stacked, and configured according to needs.

A folding container house, built with galvanized steel frames and reinforced panels, laughs off 150-mph hurricanes, 5 feet of snow, and even moderate earthquakes.

Container houses, with their rising popularity and adaptability, have become a viable choice for earthquake-resistant housing. In this article, we delve into the essential strategies and ...

Introducing our Weatherproof and Earthquake-Resistant Folding Container House, designed for versatility and resilience. Ideal for use as mobile clinics, disposable hospitals, or secure living ...

Click Here to see the many different sizing configurations. These storage units feature modular construction and riveted design, allowing for quick assembly and delivery. Fire & Explosion ...

Durable and Reliable Construction: Our earthquake equipment containers are built to withstand the harshest conditions. Manufactured using steel ...

Ideal for governments and NGOs, these temporary housing containers ship flat to save 60% transport space, with modular bathrooms pre-wired for rapid field deployment.

The folding container house rises to this challenge, offering an unparalleled combination of earthquake resistance, lightning-fast installation, versatility, and cost ...

Durable and Reliable Construction: Our earthquake equipment containers are built to withstand the harshest conditions. Manufactured using steel construction and quality materials, the ...

Ideal for governments and NGOs, these temporary housing containers ship flat to save 60% transport space, with modular bathrooms pre-wired for ...
