-----

This paper presents a systematic literature review to establish the current state of the art of photovoltaic systems in self-consumption mode and seeks to tailor the evaluations to the ...

With the introduction of the 70 kWp photovoltaic plant connected to the grid in the conditions of the Lodana university extension, it will be possible to cover 43% of the total ...

While this study primarily aims to provide scientific evidence on the potential of FPV-HPP co-location, the results and methodology can also guide Ecuadorian government ...

This research analyses the impact of floating photovoltaic generation on electrical distribution systems in rural Ecuador, specifically at the La Esperanza hydroelectric dam.

While this study primarily aims to provide scientific evidence on the potential of FPV-HPP co-location, the results and methodology can ...

With the introduction of the 70 kWp photovoltaic plant connected to the grid in the conditions of the Lodana university extension, ...

Currently in Ecuador, the participation of photovoltaic energy is practically symbolic. In the province of Manabá, generation continues to be carried out through the intensive use of fossil ...

Un equipo internacional ha investigado el potencial para desplegar fotovoltaica flotante en centrales hidroeléctricas de Ecuador, encontrando 11 de 70 emplazamientos que ...

Un equipo internacional ha investigado el potencial para desplegar fotovoltaica flotante en centrales

hidroel&#233;ctricas de Ecuador, ...

This research work is directed to analyze the level of energy poverty and its consequences on the quality of life of the population of the Colombian Caribbean region, by doing a comparison of ...

In this paper, we assess all HPPs in Ecuador and quantify the potential performance of FPV systems when installed at their sites.

Currently, in Ecuador, the participation of photovoltaic energy is practically symbolic. In the province of Manab&#237;, generation continues to be carried out through the intensive use of fossil ...

Hence, the objective of the work is to demonstrate the feasibility of introducing a photovoltaic microgrid through the case study. Due to its simplicity and versatility, a methodology was ...
