----

As MIT"s first vice president for energy and climate, Evelyn Wang is working to broaden MIT"s research portfolio, scale up existing innovations, seek new breakthroughs, and ...

At the 2025 student-led MIT Energy Conference, energy leaders from around the world discussed how to make green technologies competitive with fossil fuels.

Giving people better data about their energy use, plus some coaching, can help them substantially reduce their consumption and costs, according to a study by MIT ...

The new Schmidt Laboratory for Materials in Nuclear Technologies (LMNT) at the MIT Plasma Science and Fusion Center accelerates fusion materials testing using cyclotron ...

MIT engineers developed a membrane that filters the components of crude oil by their molecular size, an advance that could dramatically reduce the amount of energy needed ...

Unlocking its secrets could thus enable advances in efficient energy production, electronics cooling, water desalination, medical diagnostics, and more. "Boiling is important for ...

The MIT Energy Initiative& #039;s annual research spring symposium explored artificial intelligence as both a problem and solution for the clean energy transition.

Growing energy demand means the U.S. will almost certainly have to expand its electricity grid in coming years. What"s the best way to do this? A new study by MIT ...

Liquid air energy storage could be the lowest-cost solution for ensuring a reliable power supply on a future grid dominated by carbon-free yet intermittent energy sources, ...

In MIT course 15.366 (Climate and Energy Ventures) student teams select a technology and determine the best path for its commercialization in the energy sector.
