How to Participate
Current Project Locator
The following map shows the locations of current solar installations. Visit the borough links near the bottom of this page to go to an accessible version of the list of solar installations in each borough. Map updated December 2024. See more on nyc.gov/solarcontainer.
Solarcontainer: The mobile solar system
Our pioneering and environmentally friendly solar systems: Folded solar panels in a container frame with corresponding standard dimensions, easy to unfold thanks to a sophisticated rail system and no shading from a remaining container structure.

These rugged, self-contained systems integrate large solar arrays, advanced battery storage, and high-capacity fuel cells -- with optional diesel redundancy when regulatory or client requirements demand it.

Yes, a shipping container can be fully powered by solar energy, especially when equipped with a sufficient battery bank and properly sized solar array. Off-grid systems are capable of running lights, tools, computers, and even ...

Discover how solar containers and shipping container solar kits are transforming off-grid power. Learn how mobile solar units provide clean, reliable, and flexible energy for remote sites, ...

Our pioneering and environmentally friendly solar systems: Folded solar panels in a container frame with corresponding standard dimensions, easy to unfold thanks to a sophisticated rail system and no ...

Convert shipping containers into mobile power stations equipped with generators or solar panels. These can be deployed to remote areas or disaster-stricken regions to provide temporary power solutions. ...

Learn about incentives, financing, and tips for installing solar at residential and commercial properties.

The mobile solar containers and portable solar chargers are designed with easily foldable solar panels which makes them ideal for remote areas and versatile applications like mining, construction, events and emergency response.

The mobile solar containers and portable solar chargers are designed with easily foldable solar panels which makes them ideal for remote areas and versatile applications like mining, construction, events ...

In short, you can indeed run power to a container - either by extending a line from the grid or by turning the container itself into a mini power station using solar panels.

These installations encompass traditional rooftop solar to more innovative applications including solar canopies at parking lots, garages, and wastewater treatment plants, as well as combined solar plus ...

Our 20 and 40 foot shipping containers are outfitted with roof mounted solar power on the outside, and on the inside, a rugged inverter with power ready battery bank.

Yes, a shipping container can be fully powered by solar energy, especially when equipped with a sufficient battery bank and properly sized solar array. Off-grid systems are capable of running ...
