A new capacity mechanism will be established to bring the necessary new power plants to market by 2035, the report notes. This mechanism is currently under development, ...

This week, energy company Gren has announced plans to invest in two new 30-megawatt power plants, one in Tartu and another in Ahtme, Ida-Viru ...

Estonian energy sector has seen a boom of PV parks with the total capacity exceeding 1025 MW at the end of 2024, compared to the total of 37,9MW of PVs in March 2019. Also, after a ...

Recently, Trina Solar and Sunly, Estonia's leading energy company, officially signed a battery energy storage system contract for the Raba Solar Power Station. According to the ...

Austria-based renewable power producer Enery has commissioned a 9-MW/18-MWh energy storage facility in Estonia, ...

Estonia's electricity sector is interconnected with regional energy markets, particularly through connections with Finland and Latvia. The direct electrical interconnection with Finland was established in 2006 and was further strengthened by the Estlink 2 interconnector in 2014. Estonia joined the Nord Pool Spot market by 2012, securing its own price area within this regional electricity market.

Significant transformations in the oil shale-based electricity production infrastructure include the commissioning of the new Auvere Power Plant in 2018 and the decommissioning of older ...

Estonia is launching a major 300 MW solar-plus-storage project in Ida-Viru County, transforming a former quarry to boost renewable energy and energy independence.
