Are commercial & non-profit solar projects underserved?

The commercial & non-profit sectors have been vastly underserved; very few financing options, with investors focused on residential & utility scale solar. SCF's answer: PPA & takeout solutions for 100kw+commercial & non-profit projects, with both rated & unrated energy consumers.

What is SCF's approach to solar finance?

SCF's approach to solar finance was simple: Determine a vastly underserved sector of the market, identify challenges to bankability, and dedicate ourselves to creating a solution. The sector was C&I, and the challenges were credit, transaction costs & lack of industry deal flow.

How does solar financing work?

A host customer agrees to have solar panels installed on its property, typically its roof, and signs a long-term contract with the solar services provider to purchase the generated power. The host property can be either owned or leased (note that for leased properties, solar financing works best for customers that have a long-term lease).

What is a solar power purchase agreement (SPPA)?

A Solar Power Purchase Agreement (SPPA) is a financial arrangement in which a third-party developer owns, operates, and maintains the photovoltaic (PV) system, and a host customer agrees to site the system on its property and purchases the system's electric output from the solar services provider for a predetermined period.

With our Mobile Photovoltaic Energy Storage Container System, we're proud to offer a practical, scalable solution that empowers ...
