How many schools currently use solar energy?

Nearly 5,500 schools currently use solar energy systems. This number will continue to grow rapidly as solar panel efficiencies improve and manufacturing costs decline.

How do I select a solar system for my school?

To choose the right solar system for your school, consider the following factors: energy usage trends, electricity consumption, and a thorough understanding of the facilities. The solar system chosen should meet the financial and energy needs of the school, both current and future.

Why is solar power successful in K-12 schools?

A fundamental reason for solar power's success in K-12 schools is the wide range of benefits offered to stakeholders. Nearly 5,500 schools currently use solar energy systems and that number will continue a rapid ascent as solar panel efficiencies improve and manufacturing costs decline.

Do you need money upfront to buy solar?

In many states, you don't need upfront capital to go solar. Options include bonds, financial loans, equipment leasing, third-party financing, or including solar in a guaranteed energy savings contract.

The solar system chosen must meet the school's current and future financial and energy needs. From an owner's perspective, the timeline below walks through the seven basic ...
