Battery energy storage systems can address the challenge of intermittent renewable energy. But innovative financial models are needed to encourage deployment.

According to Erik, the top three financing barriers are the lack of long-term contracts, the need for project off takers, and performance guarantees.

Leases and PACE Financing: Full system leases and Property Assessed Clean Energy (PACE) programs allow homeowners to access ...

Leases and PACE Financing: Full system leases and Property Assessed Clean Energy (PACE) programs allow homeowners to access energy storage systems with lower ...

While this document provides a general approach to selecting a financing mechanism for renewable energy generation, storage, and/or energy efficiency, it does not contain tax and/or ...

Financing structure options for standalone storage projects and hybrid solar plus storage projects. The pool of potential investors in these projects by allowing project owners to transfer ...
