---

Rechargeable power supply, easy portable, available to work even without power supply. Available to collect high proportion of high-viscosity liquids, suspension of containing ...

Waterra 1 UP Peristaltic Sampling Pump is a rugged battery operated field pump for shallow groundwater applications. Accepts 110 & 220VAC and ...

Peristaltic pumps have long been used for groundwater sampling. These pumps have a number of advantages over other types of devices, but they also have some limitations. Although ...

Waterra 1 UP Peristaltic Sampling Pump is a rugged battery operated field pump for shallow groundwater applications. Accepts 110 & 220VAC and 12VDC.

This 2-channel peristaltic pump ensures a simple way of circulating both solvents through a redox flow battery or an electrolyser test cell. Functions and features include: Color LCD display, ...

It features a rechargeable battery and adjustable speed with flow rates up to 1.7 lpm. The pump head can reverse direction and uses peristaltic tubing that can be purchased from Waterra.

This 2-channel peristaltic pump ensures a simple way of circulating both solvents through a redox flow battery or an electrolyser test cell. ...

Rechargeable power supply, easy portable, available to work even without power supply. Available to collect high proportion of high-viscosity liquids, suspension of containing solids particles, Stratified sampling available, The suction lift deepest up to 8 meters.

The Alexis™ compact peristaltic pump can either run on its self-contained internal 30 amp AGM battery

or plug it into a 120-volt electric socket. The Alexis™ only weighs 37 pounds making ...

The technology of the Vanadium Redox Flow battery (VRFB) combines the performance advantages of flow batteries with the simplicity of using just one natural element - vanadium.

With a rechargeable lithium-ion battery, this hand operated peristaltic pump eliminates the need for an external power source and its integrated carrying case makes it easy to transport and ...

A flow battery is a rechargeable fuel cell in which an electrolyte containing one or more dissolved electroactive elements flows through an electrochemical cell that reversibly converts chemical ...

PM6000 Peristaltic Pump - High flow rate and self-priming. Excellent dry running characteristics. Shop Now.
