How will Bess support France's decarbonised energy system?

Beyond financial gains,expanding BESS deployment will help mitigate renewable energy curtailments and ease pressure on the grid,making it a key enabler of France's decarbonised,resilient energy system.

Is Bess revenue potential improving?

BESS revenue potential is improving. Day-ahead price spreads have doubled,and reforms to ancillary services - especially the automatic Frequency Restoration Reserve (aFRR) market - are creating new opportunities. Regulatory changes,including grid tariff reforms and a redesigned capacity mechanism,signal growing support for storage in France.

Is France becoming a more attractive market for battery energy storage systems?

This report explores how France is becoming a more attractive market for battery energy storage systems(BESS). The French electricity system is dominated by nuclear and hydropower,which results in lower volatility - typically a driver of battery economics.

What is the potential for French Bess?

In the European context,the revenue potential for French BESS has so far been moderate. France's nuclear-heavy generation mix results in relatively stable wholesale prices and lower demand for balancing services.

Global turnkey battery storage system prices fell dramatically through 2024, with BloombergNEF finding a 40% year-on-year drop to about US\$165/kWh on average--the ...
