What is a 50kw Solar System?

In rural areas where access to the main power grid is limited, Maxbo's 50kW solar systems serve as reliable energy sources, providing the necessary power for residential homes, schools, health clinics, and community centers. These systems bring modern amenities to off-grid locations, enhancing quality of life and supporting community development.

How do I design an off-grid Solar System?

Designing an off-grid solar system can be complex. There are three factors to consider when sizing for off-grid solar: The most common off-grid system configurations range from 5kW to 21kW. However, energy usage varies for every household, so the best approach is to design a custom off-grid solar kit based on your specific energy usage patterns.

What is a 50 kW solar kit?

A 50 kW solar kit is a complete PV solar power system that includes solar panels, DC-to-AC inverter, rack mounting system, hardware, cabling, permit plans, and instructions. These grid-connected solar kits are designed for homes or businesses and come with almost everything needed to set up the system quickly.

What is a DIY off-grid solar kit?

Deliver power to remote locations with our DIY off-grid solar kits. These kits contain the components you need to install a fully self-sufficient off-grid solar system, including solar panels, an off-grid inverter, and mounting materials. We'll also customize your kit with a battery bank sized to meet your storage needs.
