Discover how transforming waste into energy can provide a sustainable solution for our future. Read the article to learn about this innovative approach.

Waste-to-Energy (WtE) technologies offer a powerful solution to the global waste crisis by transforming non-recyclable waste materials into usable forms of energy, like ...

A waste-to-energy plant is a waste management facility that combusts wastes to produce electricity. This type of power plant is sometimes called a trash-to-energy, municipal waste incineration, energy recovery, or resource recovery plant. Modern waste-to-energy plants are very different from the trash incinerators tha...

Our flexible and modular solutions operate efficiently under any conditions, adapt to changes in waste fuel supply and energy demand, and offer simple relocation, if needed.

Discover how transforming waste into energy can provide a sustainable solution for our future. Read the article to learn about this ...

Waste-to-energy plants burn municipal solid waste (MSW), often called garbage or trash, to produce steam in a boiler, and the steam is used to power an electric generator ...

Instead of burying waste in landfills, WTE allows us to extract energy value from discarded materials, offering both environmental and economic ...

Our Waste-to-Energy facilities are designed to convert the waste into electricity for homes and businesses and/or steam for export to industries.

Waste-to-Energy (WtE) technologies offer a powerful solution to the global waste crisis by transforming

non-recyclable waste materials ...

Instead of burying waste in landfills, WTE allows us to extract energy value from discarded materials, offering both environmental and economic benefits. WTE supports a wide range of ...

Waste-to-energy plants burn municipal solid waste (MSW), often called garbage or trash, to produce steam in a boiler, and the steam is used to power an electric generator turbine. MSW ...

Modular systems--often housed in shipping containers--bring local, decentralized energy recovery to small towns, island nations, and even military bases. They can convert ...

The system fits in three shipping containers and is suitable for international freight. 40" open top containers transport the Gen-H combustor and the Gen-E generator, and a standard 20" one, ...

Our flexible and modular solutions operate efficiently under any conditions, adapt to changes in waste fuel supply and energy demand, and offer ...

GEMCO ENERGY currently offers two models of mobile garbage gasification energy stations: the HG-60KW and HG-120KW. These models are suitable for processing a wide range of waste ...

GEMCO ENERGY currently offers two models of mobile garbage gasification energy stations: the HG-60KW and HG-120KW. These models are ...
