Briefing Global energy storage deployment is accelerating to a new record, fundamentally reshaping power markets by providing essential grid flexibility.

Latest news on energy storage projects, BESS, capacity expansion, and regulatory updates across Europe, US & Canada, Latin America, and Asia Pacific. Discover how energy ...

"After another year of record deployment, energy storage is solidifying its place as a leading solution for strengthening American energy security and grid reliability in a time of ...

The global energy storage market almost tripled in 2023, the largest year-on-year gain on record, according to a new study by BloombergNEF (BNEF).

Synthesis of Ember's key findings from 2025, tracing how clean electricity expanded, where new growth centres emerged and how technologies like batteries and ...

"After another year of record deployment, energy storage is solidifying its place as a leading solution for strengthening American ...

BloombergNEF reported a 36% rise in grid-scale BESS installations through September, hitting new records amid policy tailwinds and cost drops, with China and the US ...

US energy storage set a Q1 record in 2025 with 2 GW added, but looming policy changes could put that growth at serious risk.

Mainland China remains the largest market, fueled by requirements that new wind and solar installations include storage. However, a February 2025 policy shift will move wind ...

The global energy storage market is poised to hit new heights yet again in 2025. Despite policy changes and uncertainty in the world's two largest markets, the US and China, ...

Latest news on energy storage projects, BESS, capacity expansion, and regulatory updates across Europe, US & Canada, Latin ...

Global installed energy storage is on a steep upward trajectory. From just under 0.5 terawatts (TW) in 2024, total capacity is expected to rise ninefold to over 4 TW by 2040, ...
