Projects in this round will be eligible for funding of up to 200,000 euros (\$218,000) per megawatt of installed capacity. Although the specific technology was not specified, lithium ...

The new plan, prepared by the Ministry of the Environment and Energy, calls for installing 4,700 MW of standalone battery projects ...

Projects in this round will be eligible for funding of up to 200,000 euros (\$218,000) per megawatt of installed capacity. Although ...

This 250-megawatt (MW), 500 megawatt-hour (MWh) battery energy storage system (BESS) is part of the Big Canberra Battery project and can store enough renewable energy to power one ...

Elsewedy Electric, a prominent player in integrated energy solutions, has announced the financial close of Greece's inaugural large-scale Battery Energy Storage ...

The auction, launched in July, has lured 93 proposals with a combined capacity of 3.3 GW, against a target of 400 MW. The winning schemes should be commissioned by the ...

The two projects were part of a total of 12 totalling c.400MW that won long-term capex support in the first round of a scheme aimed to kickstart the grid-scale storage market in ...

Greece's energy regulator has announced three separate auctions for standalone energy storage systems connected to electricity transmission networks. The application ...

The auction, launched in July, has lured 93 proposals with a combined capacity of 3.3 GW, against a target of 400 MW. The winning ...

The list of winners in Greece's maiden tender for standalone battery energy storage system (BESS) projects includes seven companies with 12 proposals, Energypress ...

The Regulatory Authority for Energy (RAE) in Greece has launched an auction for grants towards 400MW of energy storage, with ...

Projects are expected to be operational by the end of 2025. Greece's Regulatory Authority for Energy (RAE) has allocated 411.8 MW of projects from 93 proposals, exceeding ...

The Regulatory Authority for Energy (RAE) in Greece has launched an auction for grants towards 400MW of energy storage, with three weeks to submit project proposals.

The two projects were part of a total of 12 totalling c.400MW that won long-term capex support in the first round of a scheme aimed to ...

The new plan, prepared by the Ministry of the Environment and Energy, calls for installing 4,700 MW of standalone battery projects across the country, equal to the entire ...

The list of winners in Greece's maiden tender for standalone battery energy storage system (BESS) projects includes seven ...
